

▣ **Company:**

Lagoa Maintenance Inc.

▣ **Industry:**

Janitorial Services

▣ **Challenge:**

To provide an effective cleaning and maintenance program that is safe for users and the environment

▣ **Solution:**

Avmor's EcoPure  
Avmor's Av-mixx Dilution Control System

▣ **Results:**

Lagoa Maintenance's cleaning program has been simplified. Avmor's Av-mixx dilution control system has helped by reducing waste and ensuring cleaning solutions are performing at optimal level. Employees no longer complain about frequent headaches, skin irritations and coughing caused by conventional cleaningsolutions.

For the past 15 years, Lagoa Maintenance has been providing cleaning/maintenance services to corporations and government agencies throughout the province of Quebec and beyond. Like most other building service contractors, Lagoa had been using conventional cleaning products. Fuelled by demand from building managers, the company proudly made the switch to green cleaning products.

Lagoa listened to its clients and sought a green cleaning solution that would be efficient while being cost-effective. After having carefully examined and tested various products on the market, it chose Avmor Ltd.'s EcoPure. Lagoa's employees have now been using Ecopure products for a year, with much success!

One-on-one training was provided to help Lagoa through the transition. During training, Avmor clearly demonstrated proper use of the products and answered Lagoa's questions. What's more, Lagoa's employees found the ready-to-use labels on Avmor's products to be extremely clear and helpful. The clear labelling and training ensured that Lagoa would make optimum use of the products purchased, thereby resulting in cost savings. Employees were particularly pleased with the Avmixx dispenser for accurate dilution control. Before, they had been relying on the manual "glug glug" method which, inevitably, would lead to wasted product. Not only is the Avmixx dispenser easy to use, but by reducing waste, it has improved on the company's bottom line. Furthermore, Avmor's EP65 Heavy Duty Degreaser proved to be particularly efficient since it can be used on almost any clean-up job. Indeed, Lagoa uses EP65 everywhere! The product is especially handy in the cafeteria since it removes coffee stains from the floors and walls. Since making the switch, the company has noticed a significant improvement in its employees' well-being. The workers no longer complain about frequent headaches, skin irritations, and coughing.

To date, Lagoa Maintenance services four commercial buildings and a variety of government buildings using EcoPure. This represents a total of over 1.5 million square feet! There is no doubt that Lagoa has made a significant contribution to improve the Indoor Air Quality (IAQ) of all the people who step foot on these properties. By listening and quickly responding to its customers changing needs, Lagoa has set an example for others service providers to embrace the concept of a cleaner, safer, more sustainable cleaning solution.

## An Avmor Success Story

### Lagoa Maintenance goes GREEN with Avmor's EcoPure
